3. Select missing log and adjust circle size and position:

4. Click "Next" to continue

5. Results

← Measurement details ↻ Count again

 Counter - 3
Type: Incoming

 Tree species: Pine
Quality: Sawlog

 Log count: 87
Log length: 2.70m

Timbeter forestry management smart solution

Supply chain:

- Forest
- Transportation
- Storages/inventories
- Production
- Transportation / transactions

TIMBETER

Mobile apps for making and processing measurements

Cloud storage with online inventory, reporting and measurement editing features

Control over:

1. Timber origin
2. Transactions
3. Internal & external reporting
4. Logistics and transportation
5. Illegal activities
6. Sustainable forest management
7. Safety and working environment

Benefits

Time efficiency

Digitalization

Transparency

Cost efficiency

Reduction of human error

Prevention of illegal logging

Sustainability

Traceability

Logistics planning

Fair trade

Safety

Waste reduction

More Applications

Timbeter

With Timbeter, the log measuring process can be quicker and more accurate. Timbeter provides tools for measuring log diameters, pile and truck volumes, and pile density coefficient in less than 3 minutes.

Timbeter Container

With Timbeter Container, trading companies and log exporters have an option to measure timber in containers, organizing their Bill of Ladings, exchanging information in real time and keeping control of the sales.

Timbeter Lumber

Timbeter Lumber is the most efficient tool for lumber counting and volume calculation.

Our mission

Global solution for efficient, transparent and data-driven timber supply chain management.

Our mission is to save essential and limited resources in the forestry: trees, labour force and driven miles.
